Consider the advantages of using a magnetic quick change system to improve bottom line results.

Machine Tool Solutions (MTS) makes the decision process easy by listening to you.

Through listening and offering objective advice, MTS presents customers with balanced, practical solutions.

Reduced downtime is a competitive advantage.

XPress® System Features

- **100% Custom Design** - designed to match customer specific requirements
- **Fast Service** - industries shortest lead-time - measured in weeks not months
- **International Experience** - proven ability to meet specialized local needs
- **Cost Effective** - design considerations include capital & operating costs
- **Dependability** - high production standards (ISO 9001:2000)
- **Increased Safety** - designed to ensure complete operator safety during die changes and machine operation
- **Mould Surety** - XPress System is designed to ensure mould alignment and prevent any misalignment during operation
- **Product Quality** - XPress Systems delivers uniform clamping force without any mould deformation
- **Productivity** - fast die changes and shorter economical runs
- **Fast Mould Changes** - measured in minutes instead of hours regardless of size or operating temperature
